

PORTLAND PUDGY

Price List

The Portland Pudgy safety dinghy is a great rowboat and motorboat, a sailboat, and a dynamic, unsinkable lifeboat. You can *customize your order* as you choose, adding or substituting options from the itemized price list on the following pages. **You can choose the components you want, depending on how you plan to use your Portland Pudgy.**

We would be pleased to discuss your Portland Pudgy and what functions you will be using it for. Call 207.761.2428 or email info@portlandpudgy.com.

Basic Boat:

The standard basic boat includes oars, oarlocks, four oarlock sockets and adjustable middle seat (for two rowing positions), grab-lines, bridle, built-in compass, wheel, drain plug for self-draining, reflective strips, 12.5 cu. ft. of water tight storage in the double hull, and more.

If you plan to use your boat as a tender, we recommend a bow bumper and a boarding ladder/fender to protect the mother boat. These components also protect the Pudgy when docked.

The fully rigged basic boat includes all components of the standard basic boat, plus pump, boarding ladder/fender, bow bumper, boat cover, electrical system, solar panel, lifting eyes and davit harness for arm davits, or Weaver swim platform davits.

Sailboat:

The sail kit turns the basic boat into a fun, safe, and stable sailing dinghy that with skill can be sailed in 20/25 knot winds.. It also makes it a self-rescue boat. We offer two types of sail kit, gaff (shown) and square head.

The sail kit includes a telescoping mast and boom, a gaff or mast extension, two leeboards, a kick-up rudder, and a 41 square foot sail (white or orange) with a window. The mast and boom telescope to a shorter length and with the, gaff or extension, sail, and tiller, stow neatly inside the transom hatch. **The sailing system** can include any and all of the Pudgy components in addition to the sail kit.

Lifeboat Systems:

With the exposure canopy and sea anchor, the Portland Pudgy safety boat becomes an unsinkable lifeboat. You can choose the basic lifeboat system or a dynamic system that lets you sail to safety.

Basic Lifeboat System: This includes the basic boat, the exposure canopy, sea anchor, and boat cover. We also recommend the pump, the boarding ladder/fender, and the safety harness eyes.

Dynamic Lifeboat System: Add the sail kit to the lifeboat boat system, and the Pudgy becomes a dynamic lifeboat that can be sailed to safety.

The fully rigged lifeboat system includes the canopy, pump, boat cover, sea anchor, boarding ladder/fender, safety harness eyes, sail kit, electrical system, solar panel, davit harness or Weaver davits, and bow bumper.

Itemized Price List

Basic Boat \$2,995. USCG approved for 4 persons. All accessories (standard and optional) fit inside the double hull (including sail kit and oars). Available in soft white, sunset yellow, and black. Light gray seats, hatches, and motor mount. 92" long x 53" wide. Includes:

- Two 6'-6" customized, collapsible aluminum oars w/retaining sleeves & collars (\$168 value)
- Ritchie compass standard (optional electrical system illuminates compass)
- Towing bridle harness (secures to 2 stainless steel eyes w/backer disk for towing, lifting, sea anchor).
- Self-bailing with tethered drain plug (boat weight plus 25 lbs.)
- Hand-holds in keel for righting boat (which comes up dry after capsize)
- Three seats with hand holds (middle seat adjusts to two rowing positions)
- Five storage/access hatches w/gaskets (6.4" inside diameter. All accessories: sail kit, oars, exposure canopy, sea anchor, etc. fit through access hatches)
- Four reinforced through-holes fore and aft (used for tie-down, for securing fender/boarding ladder, and for use with an anti-theft, locking security cable)
- Four stainless steel oarlock sockets (for use w/adjustable middle seat), plus two stainless steel oarlocks (w/locking system to secure oars to boat) (\$39 value)
- Double roller wheels (allows one person to roll boat on dock or landing ramp)
- Grab lines (four)
- SOLAS approved reflective strips (three)
- Motor mount and aluminum retaining plate for long shaft 2HP or 3HP motors

Bow Bumper \$128. Recommended if towing. Protects mother boat from dinghy riding into stern while towing in following seas, and from bumping while moored. Looks good too. Installed. Includes:

- Coarse weave, white, "canvas" covered foam bumper with sewn ends 56" long installed on bow
- 22 wide head stainless steel screws.

Bailing Pump with gasketed hatch \$95. Mounted on gunwale by Portland Pudgy, Inc. Pumps out storage chamber or cockpit. **Recommended as part of lifeboat system.** Includes:

- Manual bilge pump, Beckson, 18" (inserts into storage chamber)
- Access port with gasket (mounted on gunwale).

Sail Kit (Two Types: Gaff Rig and Square Head Rig) \$1530. Makes the Pudgy a fun sailing dinghy or a lifeboat you can sail to safety. Either rig can store in boat through transom access hatch.

Gaff Rig Extremely stable and safe because wind spills out of the gaff even when broached (and it's fun to sail). **Square Head Rig** Does better in light air and points better. Both types **\$1530**

- Telescoping (aluminum) 8-foot mast, two position w/push-button release
- **Gaff rig:** Gaff (aluminum), 4' 10". **Square head rig:** Mast extension (aluminum).
- Telescoping 7' 6" boom with yoke and out-haul jamb cleat
- Sail, white (3.8 oz Dacron) or Safety Orange (4.0 oz Dacron). Reefs up when used w/ exposure canopy, for proactive life boat. Reefs down if sailing in strong winds (41 sq. ft.)
- Straps for adapting to leg-o-mutton configuration. (Indicated by red line in bottom photo. See second square head rig photo for actual configuration.)
- Kick-up rudder (three-position), rudder post (stores under rear seat), and aluminum tiller with stainless steel rudder/tiller connector and soft foam hand grip
- Gudgeons with pintle-lock mounted on transom
- Rigging lines, Harken carbon blocks, and traveler line with jamb cleat (mounted on Pudgy)
- Two leeboards (standard or performance, same price). Standard store under rear seat, recommended for survival system. Performance lee-boards (35" long) store under middle seat, with Velcro straps supplied.
- Sail kit storage bag.

Exposure Canopy \$2,275. Part of lifeboat system. Transforms boat into four-person, hard bottom, unsinkable, dynamic (with sailing rig or oars) lifeboat. Self-rights empty boat. Stores inside Pudgy or is pre-set on gunwales (if used in preset position requires boat cover). Includes:

- Three-section canopy (with 6" dia. flotation tubes around entire gunwale and two 6" diameter support arches) Adds 430 lbs of flotation. Canopy fabric USCG-approved international orange outside, anti-nausea blue inside (colors required by International Sailing Federation for life rafts).
- Bow and stern tubes inflate by two CO2 cylinders (in 17 seconds) or by hand pump
- Zip in middle section (with two 6" dia. flotation pods orally-inflated)
- Two top-off/pressure relief valves (US Navy approved)
- Two inflation valves and two check valves (US Navy-approved)
- Two 230 gram CO2 cylinders (one for bow and one for stern). USN-approved bellows hand pump.
- Canopy material USCG-recommended orange outside, blue inside (anti-nausea)
- Canopy secured to boat with 12 stainless steel pad-eyes (permanently mounted on boat gunwale)
- Three windows (one forward, one each side)
- Four SOLAS-approved reflective strips
- Hole with cover flap for mast when sailing with canopy set
- Rain catcher and spout with shut off valve

Sea Anchor & Rode \$389. Stabilizes boat in rough weather. **Essential part of lifeboat system.** Rugged, proven design, engineered by Fiorentino Para-Anchor for the Portland Pudgy.

- Rugged 30" dia. para-anchor (with patented stainless steel swivel ring shackle)
- 70' of 3/8" dia. rode and stainless steel attachment clip.

Lifting/Safety Harness Eyes \$139. For lifting boat onto the deck or cabin roof, lifting into a davit harness for carrying on arm davits, for tying down cargo, for use w/hiking straps, and for securing crew in safety harnesses (**recommended as part of lifeboat system**). Not to be used for bearing full weight of boat when carrying on arm davits (see Davit Harness, below).

Four stainless steel eyes, one near each corner of the cockpit, near floor.

- Aluminum backer channel for each lifting eye (on interior side wall)
- Three bolts for each lifting eye and backer channel.

Boat Covers (Three types: Basic, For Arm Davits, For Weaver Davits) All standard boat covers are silver gray Odyssey, 6.5 oz/sq yd, Acrylic coated polyester, mildew- and UV-resistant, breathable, 12" deep skirt. Custom color Odyssey fabric (instead of silver gray), add: **\$60.** Sunbrella fabric, choice of color, **3.2 x cost** of Odyssey gray. (**Note: Boat cover is required with lifeboat system when using exposure canopy in pre-set mode**).

Boat cover special fabrics and custom colors:

Basic Boat Cover \$235. Protects boat from the elements. Gives finished look.

- Bungee cord around perimeter of skirt for snug fit.
- 1" webbing pull strap at stern with stainless steel push button buckle for securing cover in severe wind. Two 1" webbing straps with stainless steel push button buckles pass under boat to secure cover. Four reinforced access slot holes for access to tie-down through-holes in boat. Reinforced corners.

Boat Cover for Weaver Davits \$285. Part #PP-BCWD. (Detail shown at right.) Same as basic boat cover, but also includes:

- Four 12" double pull zippers for access to Weaver davit mounting eyes and stand-off rods
- Four reinforced access holes: two are for Weaver davit mounting eyes.

Boat Cover for Double Arm Davits \$335. Same as basic boat cover, but additionally includes:

- Two 24" HD double pull zippers to access davit lifting lines to Portland Pudgy lifting bridles.
- Four 12" HD double pull zippers to access davit harness spring lines to lifting eye bolts on Pudgy.
- Four reinforced access slot holes for additional tie down access.

Electric System \$499. Runs safety lights and other 12-V plug-in equipment. All-around white navigational light is required by USCG for traveling at night. All LED lights in the system. Includes:

- Electrical panel with gasket and fuse
- Accessory socket (powers 12 V. plug-in equipment, and can receive power for charging battery by solar panel or charger)
- Two toggle switches (1 for compass LED & navigation LED light, 1 for red LED chart reading, interior light)
- Battery (rechargeable, 12 volt, 2.9 AH, 2.4 lbs, sealed lead acid).
- 26" – 48" adjustable, removable LED navigation light, all-around white. (Stores inside access hatch)
- Navigation light base and gasket.

Solar Panel with Adaptor \$189. Plug into electrical panel to recharge battery while on water in about 6 hours. Also can be used to charge other devices such as cell phones. Stores in boat or on canopy. Operating voltage 14.4. Operating current Amps .45

- Rollable solar charger, Power Film R-7.
- Dimensions 23 inches x 14.5 inches; (rolled dimensions 14.5 inches x 3.75 inches.
- UV-resistant, weatherproof, lightweight, flexible, and durable.

Boarding Ladder/Fender \$139. Functions as a boarding ladder, grab line, fender, and foot support to right boat. Makes it even easier to board from the water. **Recommended with lifeboat system.**

- Foam flotation cylinder with Sunbrella cover, which serves as a fender
- Web boarding ladder, which is rolled around foam cylinder and when pulled serves as ladder
- Line through cylinder, which secures to boat using ingenious metal line stops and which serves as a grab line.

Long Fender \$129. Protects mother boat from dinghy when pulled up alongside, and protects dinghy while tied up at a dock. Looks good too. Includes:

- Coarse weave, white, "canvas" covered foam fender
- Line through length of fender, with same metal line stops used in boarding ladder/fender (see above)

Weaver Davits \$415. A removable, rugged stainless steel, davit system to secure dinghy to boats with swim platforms. Stabilizes boat for boarding and disembarking. Allows the Pudgy to hinge up out of the water. **Special swim platform davits, for example those to be used on Ranger Tugs are about \$518** (depending on swim platform configuration). Includes:

- Two removable heavy duty eye pins and backer plates for Pudgy
- Two snap davit heads for swim platform
- **Stand-offs**, not included, can be purchased directly from Weaver Industries.

Weaver Quick Kit. \$109.00 Receiver plates for easy removal of the davit heads from the swim platform. Includes all mounting hardware plus pin and lanyard.

Davit Harness \$399. Used with double arm type davit system to support weight of dinghy from the underside. Secures dinghy horizontally or vertically (to avoid dinghy filling with water in a following sea). All stainless steel hardware. Note that it is necessary to use this (or other harness) to support the weight of the Pudgy when on arm davits.

- Stainless steel hardware.
- Two lifting bridles, one "H" harness for passing under bottom of Pudgy for support
- Two adjustable spring lines to stabilize dinghy in heavy seas
- Two connecting straps with st. stl. "O" ring attachment points

Four-Point Lifting Harness \$215 Used to lift the Pudgy (e.g. onto deck or cabin roof). Adjustable, for balancing Pudgy. Attaches to four lifting eyes installed in cockpit (separate item).

Note that this is only for lifting the Pudgy, it is not meant for carrying the Pudgy on arm davits. The weight of the Pudgy must be supported by a davit harness slung underneath the boat when it is on arm davits. (See Davit Harness, above.)

- Four web straps (red denotes aft straps)
- Four stainless steel hooks for attaching to lifting eyes, Four stainless steel buckles for adjusting balance, Strong stainless steel lifting ring.

Torqueedo Electric Travel Motors. Clean, powerful electric outboard motor (2 models offered). Excellent for the Pudgy. Lithium-manganese, integrated battery. On-board computer with GPS-based calculation of remaining range. Solar rechargeable – including during the voyage (w/optional Torqueedo solar panel, see below). Stepless forward/reverse drive. Manual tilting device with grounding protection.

Model 1003C long shaft. \$2499. 3HP. 915 Wh Li-Ion, weight 15.5 kg

Model 1003 long shaft. \$1999. 3HP. 530 Wh Li-Ion, weight 14.4 kg.

Torqueedo 50W Solar Panel. \$749.00. Solar charger 50W for Travel motors.

Cleat with backer plate, installed on boat \$19. Includes:

- 5", premium Nylon cleat. UV and cold resistant.
 - High-density polyethylene backer plate.
 - Stainless steel through bolts.
-

Rod holder, installed on boat. \$38. We will install the rod holders in the locations you specify on your Portland Pudgy.

- Corrosion-proof, durable polypropylene.
 - Rotating locking ring securely holds rod in place
 - Fully adjustable horizontally and vertically.
-

Anchor, rode, chain. \$79

Extra owner's manual. \$19. One hundred twenty pages. Includes all Portland Pudgy systems and accessories: Basic Boat, Sailboat, Lifeboat, Boat Covers, Para-anchor, Ladder/Fender, Electrical System, Pump, Davit Harness, Swim Platform Davits.

Stainless steel hardware. Portland Pudgy's unique oarlocks, oarlock sockets, tow eyes, and more.

- Oarlocks are \$39 per pair.
 - Contact us for other prices.
-
